

# ANNUAL OPERATIONS REPORT 2008

### **2008 ANNUAL SUMMARY**

In September 2008, Alabama One Call celebrated its first anniversary in our new facility. The new facility has been a wise investment for our operations giving us the ability to expand our services while not increasing any overhead for our operations.

Also during 2008, the Alabama One Call focused on the following objectives:

- Legislation
- Business Continuity
- Compensation Study
- Remote Ticket Entry
- Educational Efforts
- Measuring Effectiveness
- · Membership Growth
- 811 Operations

On the legislative front, Alabama One Call continued to work with the various stakeholders in damage prevention to enhance and improve the current legislation. There remains opposition to certain areas, such as mandatory membership, which we will continue to try to get included and hopefully be successfully in having stronger legislation enacted.

As our member companies continue to try to find ways to streamline their damage prevention programs and improve their customer service regarding line locating, Alabama One Call has partnered with other one call centers, as well as our members to provide programs and services to assist in this effort. Two of these programs are our APACT – Alabama Public Awareness Cooperative Training and our Ticket Management software.

The APACT program, completing its third year in 2008, assists our gas distribution and pipeline companies with meeting the federal mandate on public awareness programs across the state. We conducted 17 public awareness programs reaching out to emergency responders, excavators and public officials to educate them on the safety awareness needs. This program continues to grow and is helping to improve the awareness of safe excavation across the state.

The AOC Board also approved the development of a ticket management program to be used by our members to help automate the receipt and management of the locate requests they receive from us. Alabama One Call, and its other one call partners in Progressive Partnering, our one call software provider, developed this program and have provided it to our members as part of their regular membership. This is a web based program that allows the members the ability to receive their locate requests via the internet and they can manage their locate volume by plotting the locations on the map, routing locates to designated locators and archiving the data for analysis, in addition to many other features. This software was implemented and finalized in 2008 and was made available to our members in 2009.

Alabama One Call also developed an E-Locate Request ticket that can be used by homeowners and low volume excavators to enter their locate request straight from Alabama One Call's website. The information is submitted to the one call center, reviewed and mapped by a CSR and then queued out for transmission to the effected member companies. This program is in addition to our GeoRemote – Remote Ticket Entry – program that has been operation for several year. The E-Locate Request program was also operational beginning in 2009 and is just another avenue to assist the excavating community in the ability to access the one call center services.

Alabama One Call did experience a drop in our call volume during 2008. As fewer excavation projects and new home construction is planned, our call volume is directly affected. This seems to be a trend throughout the southeast and the nation as a whole with the decline of the economy. However, Alabama One Call is continuing to educate on the need to "Know What's Below – Call 811 Before You Dig."

Each year, Alabama One Call's Board of Directors and Staff work hard to provide an effective and cost efficient damage prevention program to reduce the chance of damage to the underground utility infrastructure that the citizens of Alabama depend on daily. We again thank you for your support of this effort and for the role you play in making Alabama a safer place to live and work.

Annette R. Reburn Executive Director February 2009
